

Mr. B & Mr. C

The Worlds First Pocket Radio

"...totally rockin'... I've rarely heard a non-professional web-based band sound this polished ...one of the most entertaining albums I've heard ..." (halfgoon.com)

The greatest band that never was bursts onto the scene, with a debut album of 14 feel good tracks of electro punk pop. Stop irradiating yourself in front of the television and dance along to these hip new sounds by two kids from the inter-webs. Drop that book you are using to beat your wife with and drag the whole family around the wireless.

Mr B & Mr C is a two piece slung together by the muddled magic of modern technology. Mr B gallavants through the dusty, cracked expanse of South Australia, while Mr C wallows in the depressing, grey mire that is the United Kingdom. Such contrasting environments have birthed a jilted, lopsided, schizophrenic album of electro, pop, rock, punk and anything else that could be pinned down long enough to trap in song-form, like mosquitoes in amber. These two kind gentlemen would be delighted if you could explore with them issues of infidelity, necrophilia, plagiarism, infomercials and pedophilia, so they happily hand you these fourteen spanners to jam into the cogs of the corporate machine.

Q: *Are you one of those who say music is fast becoming a mindless, profit driven consumer product, and aimlessly wonder what happened to those songs that changed the world?*

A: It wasn't testing well, so keep your art out of the revenue stream.

Mr B & Mr C, for two, decided to do something for, and about, greedy corporate artsy middle class types, so **The Worlds First Pocket Radio** is available for free on the internet, no catches. Just go to the site, download the songs for free, and listen to them. NO lawyers will send you summons. NO police will kick down your door. Its just free music, made for people by people - easy.

But if you want to send us money, we certainly don't discourage that.

If you want more information on *Mr B & Mr C*, you can contact either at mrbandmrc@gmail.com. Each is an individual, and there is no collusion on philosophy or ethos, so answers may vary, and be wildly contradictory.

THE WORLD'S FIRST POCKET RADIO

Mr B & Mr C

Uses tiny transistors... no bulky tubes, combines amazingly compact size, high performance

You can contact Mr B and Mr C at mrbandmrc@gmail.com

TRACKLIST SUGGESTIONS

Short on time? Work, for instance, for a popular commercial radio station, and don't know where to start? Luckily we can help you.

Chuck Norris Exercise Machine is a fairly broad song, containing elements of rock, political satire, and references to the worlds greatest head kicker, Chuck Norris.

It would be ironic if **The Single** made it onto airplay. I mean, listen to it. Ironic. FULLY IRONIC!

With You rocks hard, like Fallout Boy or My Chemical Romance. Money in the bank. Get the sales team out and pre-sell the shit out of that airtime.
